

Product Fact Sheet

PetroLinator Operating Cost Guarantee Program

The operation of the PetroLinator has proven to be so reliable that EnSolve Biosystems will guarantee the operating costs with an Operating Cost Guarantee Program covering all costs of consumable items for the PetroLinator system. This agreement will allow you to lock in the annual operating costs of the PetroLinator to avoid any unexpected expenses with your OWS treatment system and your operating budget.

This option will provide operating costs budgetary protection for your Bilge Water Treatment system. A fixed quarterly services and consumables fee will be charged for the life of the agreement that will cover all consumable items required for normal operation of the PetroLinator. A field service visit is included as part of the program to insure that the system operates at peak efficiency.

EnSolve Biosystems, Inc.
